~~Eric~~	~~16th September~~	~~Email contact user bug~~	~~Error when attempting to send a user an email from their profile without being logged in. To reproduce: Don't be logged in, go to a user's profile, click send email, type an email and try to send it. You will now be prompted to log in. Log in and you will receive an error page. May be fixed when the bug on line 9 is fixed.~~	~~Andy~~
~~Andy~~	~~16th September~~	~~Invisible headings~~	~~Some of the headings that are now white can't be seen.~~	~~Andy~~

~~Andy~~	~~16th September~~	~~Heading/Colums mismatch~~	~~Manage Books has the wrong column titles.~~	~~Andy~~
~~Andy~~	~~17th September~~	~~Text books / Textbooks~~	~~Home page should say "textbooks" not "text books".~~	~~Andy~~
~~Olivia~~	~~17th September~~	~~Firefox mailto: link fail~~	~~In firefox the "Contact Us" button on the homepage doesn't work.~~	~~Andy~~
Lachlan	24th September	Mobile/Tablets	Display of navbar and certain elements on pages (log in) not apart of bootstrap make the website display incorrectly/not to our liking.	
~~Group~~	~~24th September~~	~~Admin Contact Us Link~~	~~Change from mailto: link to a bootstrap modal similar to contact between users.~~	~~Andy~~
~~Andy~~	~~4th October~~	~~Hidden Book Entry Fields~~	~~If an invalid year for example is entered, then the error is shown but the fields are hidden so it can't be fixed easily by the user~~	~~Andy/Eric~~
~~Eric~~	~~8th October~~	~~Account manage link~~	~~Uers are unable to access their account manage page by clicking their name in the navbar on the left~~	~~Andy~~
~~Eric~~	~~8th October~~	~~Users unable to easily access their profile~~	~~Probably a good idea to have a link to the users profile from their user manage page. Or what might be better is if they click their name in the nav bar then they are taken to their public profile page. And then from there they can see a link to go to their manage page.~~	~~Andy~~
Jack	8th October	Skewed contents on page	When using Firefox, the contents of various pages seem to be skewed from the centre. Eric addition: I'm getting this too tested in both firefox and chrome so probably applies to all browsers. In particular the book title entry in the /create page is off center a bit as well as all of the buttons in the user /manage page. Possibly more that I haven't checked,	
~~Andy~~	~~8th October~~	~~Incorrect first name on nav bar~~	~~For email addresses like mine (a16.cooper@...) The nav bar message says "Hello a16!" Should say "Hello Andy"~~	~~Andy~~

Eric	19th October	Borrow own books	Users are able to borrow their own books.	Eric
Eric	19th Oct	Accept button in email for book requests	When the borrow request email says "You may Accept or Decline the request here." the link to 'here' automatically accepts the request on click rather than going to a page to let the user decide.	Andy
Eric	19th Oct	Early book return	Not sure where it's at in development. After clicking return on a book that you've borrowed it takes you to the owner's page to (I assume) rate them? Book is not removed from the list of books you're borrowing though. Just seems incomplete.	
Andy	19th Oct	Borrow Books Twice	If you go to the public profile of a user and click on a book title that has been borrowed, you can then click the Borrow button and send them an email. The email doesn't send and the request doesn't happen (good), but there is no error message or anything for the user who thinks they're sending a request to borrow a book.	Liza
Andy	19th Oct	Don't show Borrow button for owners books?	Instead of an error we could just not show the borrow button? Not a big deal though. (when a user attempts to borrow their own book).	Eric
