Personal Portfolio №1

The following document will describe the key points of my contribution to the Textbook Sharing website, Texchange, as a member of the Vicious & Delicious team.

1   USER REGISTRATION CODING

- Implemented code for "@connect.qut.edu.au" email validation.
- Implemented partial views for administrator and general user accounts so that administrator do not see "Contact Us" and "Submit book" fields.

2   ADMINISTRATOR ACCOUNT

- Implemented code to examine if the logged in account is "ifb299books".
- Implemented code for editing and deleting general user accounts that are registered in the system. Administrator can never delete its account within the UI.
- Implemented JavaScript popup for administrator notification that account has been successfully deleted.

3   LAYOUT DESIGN

- Implemented static layout using CSS and Bootstrap modeling for every view of the system.
- Added the favicon.

4   USER ACCOUNT MANAGEMENT

- Implemented a user account view that allows users to see the list of their submitted books, change password and deleted or change their phone number.
- Implemented a book list view for changing and deleting all submitted books by the current logged in user.
- Implemented database update coding for phone number deletion and editing.

5   "FORGOT PASSWORD?" CODING

- Implemented coding for SMTP server for sending the link to reset current existing password.
